DETAILED ACTION

Election/Restrictions

- 1) Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, 12, 22, ²³35, 45, 46 are drawn to creating a form, classified in class 715, subclass 506.
 - II. Claims 13-21, 36-44, drawn to decoding existing forms, classified in class 715, subclass 517.
- 2) The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination invention I has separate utility such as creating/generating form by defining information and encoding without requiring decoding of an existing electronic form and extracting of zoning and structural information. Subcombination II has separate utility such as decoding an existing electronic form and extracting user data. See MPEP § 806.05(d).
- 3) Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4) Applicant is advised that the rely to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
